

You're invited!

Receive 7 professional development hours and attend one of four **FREE** 2014 Design Engineer education programs offered at the newly upgraded Schneider Electric Technology Center (SETC) in St. Louis, MO.

Click the date that works for you and register online:

> 4/30 - 5/1 > 6/25 - 6/26
> 9/24 - 9/25 > 11/19 - 11/20

Seating is limited.
Registration is required.

The Program begins on Wednesday at 1:00 pm Central and ends Thursday at 3:30 pm Central. All flight, transportation and accommodations will be arranged for you and are compliments of Schneider Electric. The Program offers seven professional development hours.

For those of you who arrive before the program begins, we will offer an accredited multi-disciplinary course focused on Data Center Infrastructure Management that offers one additional professional development hour. The course will be offered at the SETC from 11:30 - 12:30 pm.

Lunch will also be available at the SETC prior to program start.

A BCD travel agent will contact you within a week of your registration to book your flight. You will receive a final event program overview a week prior to your registered date.

Hotel Accommodations provided by:

Hyatt Place St. Louis/Chesterfield
333 Chesterfield Center E, Chesterfield, MO 63017

All flight, transportation and accommodations are compliments of Schneider Electric.

Day 1

Join our subject matter experts for an interactive presentation of helpful tools available once a new project has been identified and the conceptual design phase begins. Discover trends like virtualization; what it means to your customers, why they are embracing it, and how it impacts your design.

Discuss:

- > Reference designs
 - > Data Center Infrastructure Management (DCIM)
 - > Building Information Modeling (BIM)
- ... and how including them in your initial design allows for more accurate planning.

From there your expert presenters will break you into Electrical and Mechanical groups for a deeper dive into Computational Fluid Design tools like EcoStream and discussions around electrical codes.

Participate in an engaging tour of the entire technology center including:

- > Critical Power Performance Center
- > EcoStruxure Theatre
- > Cooling Performance Center
- > Prefabricated Modules

Then unwind during a networking dinner event somewhere fun and retire to the brand new Hyatt Place in Chesterfield.

Day 2

Targeted and technical information will be broken into Electrical and Mechanical tracks core to the construction document phase. Deep dive into the different data center and non-IT solutions offered by Schneider Electric.

Participate in tours and view live demonstrations of the Galaxy VM, 1125, PX Flex, EcoBreeze and Uniflair to name just a few.
