

## “And they’re off...”

### THE ISSUE:

Belterra Park, Gaming & Entertainment Center, formally Riverdowns, was quickly approaching Opening Day and needed several Uninterruptible Power Supply (UPS) Systems to back up their critical equipment, gaming machines and security systems.

### THE SOLUTION:

**greensource** Cincinnati designed a complete solution, with 5 Schneider Electric IT Symmetra LXs, & power distribution units to be located throughout the newly refurbished gaming entertainment center.

Steven Surges, **greensource** Cincinnati sales engineer, managed

the project. He assisted in specifying the equipment that best fit their needs, coordinated the delivery, installation and startup, within a very limited time frame. Success! All UPS Systems were up & running backing up all critical equipment, so they could open on their scheduled date, May 1, 2014.

### EQUIPMENT DISTRIBUTORS:

Graybar Cincinnati

Millenium Information Technologies (MIT)

### INSTALLING CONTRACTOR:

Guarantee Electric

Mayers Electric

*“The \$300 million Belterra Park sits next to Riverbend and Coney Island in Anderson Township. It boasts 1,500 video lottery terminals, nearly 40,000 square feet and six restaurants.”*

*WLWT - Cincinnati*

### EQUIPMENT INSTALLED:

5 Symmetra LX UPS

Power Distribution Units (PDU)
