

Grand Opening March 4, 2013!

Jackpot Power Solutions for Cincinnati's first Luxury Casino

THE PROJECT:

Provide All-In reliable power for a mandated 24/7 critical uptime environment.

THE SOLUTION:

greensource Cincinnati was honored to be chosen to participate in a project that was estimated at \$400 million, and would provide 1700+ Casino jobs, not to mention the months of work the construction of the project provided to the contractor community and dozens of vendors.

greensource Cincinnati provided not one, but 4 separate UPS solutions to meet the stringent requirements

for continuous load support for Cincinnati's first luxury Casino.

Safety of patrons, and reliability of the thousands of electronic devices from slot machines to lighting being utilized in the casino was of the utmost concerns for the owners of this Casino.

One of the largest systems was deployed to handle the majority of the load and then 3 smaller systems were also installed to handle various sections of the Casino floor, behind the scenes Casino magic, and the security devices.
