

Kentucky State Police

CASE STUDY

*“Working with **greenSource** Cincinnati was a great experience for Pomeroy, as we were able to provide our customer with a seamless solution that provided reliability and efficiency. The **greenSource** team was available and onsite during planning, installation and start-up, complementing Pomeroy’s efforts and satisfying our customer”.*

-Brett Kiser, Director of Sales- KY Public Sector - Pomeroy

Creating a “New” Space with a Unique Solution

THE PROJECT:

Provide a solution for a renovated building which included a legacy data center with a 12” high raised floor.

THE SOLUTION:

greenSource Cincinnati was pleased to create a solution for an existing building that the Kentucky State Police took over and renovated, including a legacy data center with a 12” high raised floor. Conventional room based cooling was not a good option due to the lack of space under the floor for air-flow, as well as the higher density in the new racks.

greenSource Cincinnati provided a solution, along with Pomeroy, to

propose and furnish a complete APC data center Infrastructure package including: modular, scalable UPS; racks and rack PDU’s; hot aisle containment system; inRow chilled water units; chiller; humidifier.

The equipment was installed by Monroe Mechanical. **greenSource** Cincinnati saw that all bases were covered from the beginning to the end with our project management team on site.

PROJECT ENGINEER:

greenSource Cincinnati

IT INFRASTRUCTURE:

Pomeroy

MECHANICAL CONTRACTOR :

Monroe Mechanical

EQUIPMENT INSTALLED:

Symmetra PX 80-100kVA UPS

Symmetra PX 40kVA UPS
