

*“The representative from **greenSource**, Steve, was on hand during the installation and training with an APC representative for our new UPS, it was very helpful to have both people present at the same time. In addition to answering our questions about parts and equipment ordered from greenSource, Steve helped us determine how our current system could be integrated with the new UPS, and what we should purchase to expand our system further.”*

*- Kelly E. Theisen , Department of Chemistry, University of Cincinnati*

## PX100 at The University of Cincinnati

### THE PROJECT:

The chemistry department at the University of Cincinnati had been trying for 7 years to consolidate the many IT closets located all over the campus into one data center. APC’s Symmetra PX100 with modular distribution was the product best suited for the situation.

### THE SOLUTION:

**greenSource** Cincinnati partnered with Graybar Electric, United Electric and Fosdick & Hilmer to design the datacenter. Not only did **greenSource** Cincinnati provide a solution to manage their needs with

one system but it was also the most energy efficient solution.

**greenSource** Cincinnati provided support and direction that UC needed to help them along the way, by providing project management from start to finish; On-site assistance during **Delivery, Assembly** of equipment, On-site assistance during **Startup** with a Schneider Electric technician, & finally **Training** to get the equipment configured on their network, and allow them to manage it going forward.

### PROJECT MANAGER:

**greenSource Cincinnati**

### ELECTRICAL DISTRIBUTOR:

**Graybar Electric**

### ELECTRICAL CONTRACTOR :

**United Electric**

*“Steve was on-hand during installation & training..for our new UPS, it was very helpful...”*

### ELECTRICAL ENGINEER :

**Fosdick & Hilmer**

### EQUIPMENT INSTALLED:

**APC Symmetra PX100**

**PROVIDING TURN-KEY DATA CENTER SOLUTIONS, AND ENERGY SAVING PRODUCTS**
